```
<terminated> Main (1) [Java Application] C:\Program Files\Java\jre1.8.0_231\bin\javaw.exe (14-Dec-2020, 10:56:53 am)
Welcome to File based Key-Value Data Store:)
How do you like to create a file?
Enter the name of file

dryrun.txt
Created the file Successfully!! :)
What Operation do you want to perform on the existing file?

1->writeToFile; 2->Read; 3->ModifyValue; 4->DeletePair;(OR) Any Character for Exit

Choice:

1
Enter Key :

abc

Enter Value :

1
Key-Value pair has been added in dryrun.txt
```

**Key-Value Pair read operation:**

```
Choice:

2
Enter Key :

def
{def : 2}
Choice:

2
Enter Key :

jkl
{jkl : 479}
```

### Key-Value Pair modifying operation:

```
Choice:
2
Enter Key :
abc
{abc : 1000000}
Choice:
3
Enter Key :
abc
Enter new Value :
4658
File Modified Successfully!!
Choice:
2
Enter Key :
abc
{abc : 4658}
```

### Key-Value Pair Deletion operation:

```
Choice:
4
Enter Key :
def
Key-Value Pair deleted Successfully!!
Choice:
2
Enter Key :
def
Invalid KEY!!
Choice:
3
Enter Key :
def
Enter new Value :
356
KEY not found!!
```

## Input/Output Handling:

Choice:

1

Enter Key :

Seetha

Enter Value :

ram

Invalid input!! Key->String; Value->Integer  
Process terminated!! Run Again
